

Jefferson County Public Schools

CMAS, PSAT & SAT Results Year-by-Year, School-by-School

Elementary & Middle Schools: 2019, 2021-2026 (by grade) | High Schools: 2021-2026

2020 CMAS assessments were not administered due to COVID-19. Organized by Jeffco articulation area, plus Option and Charter Schools.

About This Report

Produced by:

- Tom Coyne, former member of Jeffco Schools' District Accountability Committee

Scope of this report:

- This report covers Colorado Measures of Academic Success (CMAS), PSAT, and SAT achievement results, school by school, for Jefferson County Public Schools (District 1420).
- It does not include schools that were closed or consolidated between 2019 and 2026, when their students were reassigned to other schools (or, in one case - Campbell Elementary - the school itself was converted to an Early Childhood Education Center). The analysis is limited to schools that were open, and serving the same grade span, across the full period shown.

How to Read This Report

Data sources, metrics, and notes

Elementary & middle schools

- Two tables per school: ELA and Math, Percent Met/Exceeded Expectations, by grade (3-8) and by year.
- Only grades the school actually serves are shown; grades never reported for that school are omitted entirely.
- Years shown: 2019, 2021, 2022, 2023, 2024, 2025, 2026. No 2020 column - CMAS was not administered in 2020 due to COVID-19.
- 2021 was a reduced-scope “Required Tests” year: each grade took ELA or Math, not both, so some grade/subject cells are blank by design, not suppression.

High schools

- Four tables per high school: Reading/Writing and Math, each showing Mean Scale Score and Percent Met/Exceeded the College & Career Readiness standard, for PSAT 9, PSAT 10, and SAT 11.
- Years shown: 2021-2026 (2019 excluded - the source data for that year does not report a comparable Met/Exceeded percentage).

N/A cells

- N/A covers: results suppressed to protect student privacy (small group sizes), a grade/subject not tested that year (see 2021 note), a school not yet open or since closed/consolidated, or 2025 PSAT/SAT Mean Scale Score (not published by CDE - only the Percent Met/Exceeded figure is available for 2025).

Organization

- Slides are grouped by Jeffco's 17 articulation (feeder-pattern) areas, each preceded by a divider slide listing its schools and Community Superintendent.
- A combined Jr./Sr. High School (e.g. Alameda, Jefferson, Pomona) gets both an elementary/middle-style CMAS slide (for its middle-school grades) and a high-school PSAT/SAT slide.
- After the 17 articulation areas, two more sections follow the same slide format: Jeffco Option Schools, and Jeffco Charter Schools (including Golden View Classical Academy, which is authorized by the Colorado Charter School Institute rather than Jeffco but is physically located in the district).
- This report excludes schools closed or consolidated between 2019 and 2026, or repurposed to a grade span with no CMAS-tested grades (see “About This Report”).

Data sources

- CDE CMAS ELA/Math District and School (Summary) Achievement Results, 2019/2021/2022/2023/2024/2026. CDE PSAT/SAT District and School (Summary) Achievement Results, 2021/2022/2023/2024/2026 (2025 figures drawn from the 2026 file's prior-year column). Golden View Classical Academy figures are drawn from the same statewide files under its CSI school code.

Median Growth Percentile vs. Proficiency

Two different measures of student performance — often confused

What each measure asks

- CMAS “Percent Met/Exceeded Expectations” (used throughout this report) asks: has the student reached the knowledge and skills Colorado expects at this grade? That is attainment against a fixed standard.
- The Median Growth Percentile (MGP), reported separately by the Colorado Growth Model, asks: how much progress did the student make this year compared with academically similar peers? That is growth relative to other students — not a percentage of students proficient.
- A growth percentile is not a percentage of students who are proficient, and it is not a percentile rank of the student's own achievement level.

Why MGP is easy to misread

- Because MGP is peer-relative, a school can post a median MGP above 50 — which sounds like “above average” — while the percentage of its students who are proficient stays flat or actually declines.
- In practice, schools exist with an MGP above the 50th percentile where the percent of their students who are proficient stayed the same or declined.

The four possible combinations

- High proficiency + low MGP — many students already meet the standard, but growth is modest.
- Low proficiency + high MGP — students are gaining ground quickly, but many have not yet reached grade level.
- High proficiency + high MGP — the strongest result: students are meeting standards and continuing to grow.
- Low proficiency + low MGP — students are behind, and not closing the gap.

The bottom line

- CMAS proficiency measures how well students have reached Colorado's standard; MGP measures how fast they are moving toward it — they answer different questions and can move in opposite directions.
- A rising or above-50 MGP is good news for a school only if proficiency is also holding steady or improving. Judge schools on both numbers, never on MGP alone.
- After high school, employers, the military, and colleges are really only interested in proficiency.

Notes on Teacher Pay in Jeffco

Context for the achievement results in this report

- Under the Collective Bargaining Agreement between Jefferson County Public Schools and the Jefferson County Education Association, teachers work 185 days/year.
- Teachers are paid on the basis of “Steps” and “Lanes.” Steps refer to a teacher’s years of experience. Lanes refer to their accumulated education (e.g., Bachelor’s, Master’s, or Doctoral-level credit).
- Each year, a teacher moves up to the next pay step. They move to the next lane based on their accumulated education credits.
- The top of Jeffco’s 22-step pay scale — a Master’s degree plus 90 additional academic credits — pays \$112,995/year (\$146,893 for a 240-workday year), before any annual Cost-of-Living Adjustment (1.5% of base pay in 2024/25). About 1,530 teachers (31% of the workforce) are at this top step.
- If a teacher at the top step retired at 60 after a 35-year career, they receive a lifetime pension of \$98,871 per year, or \$8,239 per month for life.
- A new teacher with a BA is paid \$56,025 for a 185-workday year (equivalent to \$72,681 for a 240-workday year). By comparison, the U.S. Census puts Jeffco’s median annual income for full-time (240-workday) workers at \$79,160.
- Jeffco’s total spending on teacher compensation increased 40% between FY2022 and FY2025, versus 22% growth in district revenue and 20% inflation over the same period.
- If the proposed Mill Levy Override is approved by Jeffco voters in November 2026, \$55 million - about 75% of the higher taxes raised - will go to even higher teacher pay.
- *As shown by the student achievement data presented in this report, rising teacher pay in Jeffco has not been accompanied by steadily improving academic performance: district-wide 8th-grade CMAS proficiency fell from 51% to 48% in ELA, and from 42% to 41% in math, between 2019 and 2026.*

Jeffco Educator Salary Schedule, 2026/2027
